

Façade

At Meinhardt, our multidisciplinary approach and global bank of knowledge in façade engineering consistently deliver exceptional solutions that are original, practical and budget-conscious.

Buildable Designs

To construct creative and commercially successful buildings requires an innovative mind and expert knowledge.

All members of our Façade Engineering team are professionally qualified in an engineering or architectural discipline and fully appreciate the importance of consistent design thinking across all touch points of the project.

We consistently deliver original solutions and take pride in revolutionising designs, having pioneered the first utilised curtain wall with flush sash frames, which is now a common feature on many buildings. Apart from pushing the boundaries of design, we value practical solutions that are within the budget.

Together with our Clients, we are invested in providing quality façades for future buildings.

Our Façade Capabilities:

- Façade Design & Engineering
- Façade Remedial & Forensic, including defect surveys and due diligence reports
- Environmentally Sustainable Design
- Building Maintenance Unit Design
